RAMA OMAR ALSAAB

Information Technology Student

Ramaalsaabb@gmail.com 0533174556 Riyadh, Saudi Arabia linkedin.com/in/rama-alsaab-50b152357
github.com/ramaalsaabb-cmd

Summary

Information Technology student with experience in software and game development, VR/MR, cybersecurity, networking, and emerging technologies. Seeking a co-op opportunity to apply technical skills, gain professional experience, and contribute to real-world projects.

Education

Bachelor of Information Technology, *Princess Nourah University* 08/2023 – Present
Riyadh, Saudi Arabia

Graduation Project: PersonaShield AI — An AI-powered cybersecurity platform focused on personalized security awareness and digital threat detection.

Skills

- **XR & Game Development** (Unity, Unreal Engine, C#, VR, AR, MR, Game Development, Interactive Experiences.)
- **Programming** (Java, C#, JavaScript, SQL, Object-Oriented Programming)
- **Cybersecurity & Networking** (Cybersecurity Fundamentals, Computer Networking, CCNA)
- **IoT & Embedded Systems** (ESP32, Arduino, BNO055, Sensors, Microcontrollers.)
- **Version Control & Development Tools** (Git, GitHub)

Certificates & Training

VR Development & Emerging Technologies Bootcamp — Tuwaiq Academy | 160 Training Hours | 2026

Mechatronics Engineering Fundamentals Bootcamp — Tuwaiq Academy | 100 Training Hours | 2026

CCNA: Introduction to Networks — Cisco | 2025

Oracle Java Foundations — Oracle | 2024

Junior Cybersecurity Analyst Career Path — Cisco Networking Academy | 2024

Leadership & Activites

Game Development Track Member, *Tuwaiq Club, PNU* 05/2026 – Present

Project Management Member, *Elixir Hub* 09/2025 – 01/2026

Technical Training Member, *Cyber Security Club (CYSC)* 08/2025 – 01/2026

Head of Marketing Committee, *RoboTechX* 09/2025 – 12/2025

IoT Committee Member, *Ajyalna Alwaidah Initiative, PNU* 07/2025 – 10/2026

Projects

THABAT — MR Bomb-Disposal Training Simulator, *Defensthon* 05/2026
- Developed a Mixed Reality simulator using Unity and Meta Quest for simulated bomb-disposal training.
- Integrated an ESP32 + BNO055 haptic glove to detect hand stability, with a live dashboard tracking stability, warnings, and performance score.
- Defensthon Hackathon — organized/supported by Tuwaiq Academy, GADD, Ministry of Education, and NCMS.

SYRAX — Financial Scam-Awareness Trainer, *Amad Hackathon* 07/2026
- Developed a VR and web training platform using Unity and Meta Quest to simulate phishing, impersonation, and pressured-call scams.
- Implemented safe/unsafe decision scoring with a results dashboard.

VR Mechatronics Lab Simulation, *Tuwaiq Academy* 05/2026
- Developed an interactive VR lab teaching Arduino and hardware basics through component identification, LED wiring, and simulated Arduino programming.

Retro Memory Camera, *Tuwaiq Academy* 07/2026
- Built a retro-style device that displays preloaded photos as digital memories, combining 3D design, electronics, and microcontroller programming.

KATHEEB – VR Sled Motion Simulator, *Expo 2030 Immersive Challenge* | *Tuwaiq Academy & Misk Skills* 10/2026 – 10/2026
- Developed an immersive VR sled experience using Unity and Meta Quest 3, featuring realistic desert terrain, vehicle movement, turns, and bumps.
- Integrated Unity with ESP32 hardware via WebSocket to transmit real-time motion data and synchronize a physical sled mechanism with the VR simulation.
- Contributed to an interactive VR and mechatronics prototype during the Expo 2030 Immersive Challenge.

Awards & Honors

Certificate of Appreciation — Extracurricular Activities, *Faculty of Computer & Information Sciences, PNU* 06/2026

3rd Place — Robotics Track, *Defensthon* 05/2026
Team THABAT

Languages

Arabic — Native/Bilingual

English — Proficient
